The Honorable Max Baucus  The Honorable John Dingell
Chair    Chair
Committee on Finance    Committee on Energy and Commerce
United States Senate    U.S. House of Representatives
Washington, DC  20510    Washington, DC  20515

Dear Majority Leader Reid, Speaker Pelosi, Minority Leader McConnell, Republican Leader Boehner, Chairman Baucus and Chairman Dingell:

The undersigned members of the Leadership Council of Aging Organizations (LCAO) applaud your attention to the issue of fiscal stimulus and economic recovery.

We support an increase in the Federal Medical Assistance Percentage (FMAP) as a part of the second economic stimulus bill. Such an increase should be used solely to increase the federal level of effort for Medicaid. We believe an increase in the FMAP is an effective way to stimulate the economy and therefore one of the best ways of avoiding the cuts in health care, education, local government aid, and other critical services that are threatened by state fiscal crisis. There is also a clear and proven precedent for an increase in the FMAP during tough economic times: In 2003 Congress provided states with temporary fiscal relief, which had a significant positive effect on states' business activity and wages.

Some states have already begun to implement drastic cuts to Medicaid due to state budget shortfalls; many other states are considering such cuts. These cuts will further aggravate the economic downturn. Therefore, we appreciate your quick action to pass an economic stimulus package that includes providing state fiscal relief by temporarily augmenting the current level of federal support for state Medicaid programs.

Temporarily raising federal Medicaid match rates is a targeted, temporary, sound, and proven approach that would stimulate the economy and help prevent states from taking actions that
would jeopardize the health care and services needed by millions of older adults and people with disabilities. **Since it is clear that this economic impact of this recession will last for several years the FMAP increase should be at least $35 billion and require states to maintain their Medicaid coverage by imposing a strict maintenance of effort requirement.**

Furthermore, rising food and fuel costs are reducing the already-lean Older Americans Act (OAA) programs and services to vulnerable elders at the community level, even as those same costs drive increasing numbers of older adults to seek help. National surveys by several LCAO members in recent months attest to the funding crisis, which is forcing cuts in meals served, rides to doctor's appointments, home health visits and the many other supports that allow seniors to live independently in their homes and communities. Vulnerable seniors living in long-term care facilities are at increased risk of poor care as volunteer and paid ombudsmen are forced to reduce visits by as much as 50%. All of these supports rely heavily on volunteers, who are unable to maintain their level of service with the rising fuel costs.

**We urge you to include $60 million for OAA senior nutrition programs and to provide additional emergency funding for OAA programs.** The economic stimulus bill the Senate proposed earlier this year, but did not become law, did include this funding for OAA nutrition programs and we ask you to include it in any economic stimulus bill. Without such emergency spending to stem the tide of service reductions, greater and greater numbers of seniors will go hungry, become isolated, suffer deteriorating health, face the prospect of unnecessary (and ultimately more costly) institutionalization, and those living in institutions will lose advocacy resources.

Thank you for considering these recommended strategies as you move forward to protect the millions of low-income people who rely on these safety net supports.

Sincerely,
