Dear Majority Leader Reid and Minority Leader McConnell:

The undersigned members of the Leadership Council of Aging Organizations (LCAO), a coalition of national not-for-profit organizations representing nearly 60 million older Americans, applaud your leadership to sustain our nation’s economic recovery and urge you to extend the increase in federal Medicaid matching rates (FMAP) included in the American Recovery and Reinvestment Act (Recovery Act) of 2009.

All states have seen an extraordinary acceleration in Medicaid enrollment: 3.28 million Americans have enrolled from June 2008 to June 2009. At the same time that demand for Medicaid is escalating, states have been hobbled by the steepest-ever decline in state revenues due to recession. The Recovery Act funds have been vital in helping states to preserve Medicaid eligibility, and to avoid or limit cuts to the program. This lifeline of funds for Medicaid, however, will end mid-way through most states’ 2011 fiscal year budgets (December 31, 2010), when state economies will still be in crisis. The extension of the Recovery Act funds should also continue the maintenance of effort requirements. Because of this requirement millions of seniors continued to be eligible for Medicaid that often provides vital home- and community-based services benefits.

Without the continued Recovery Act funds and maintenance of effort requirements, states are likely to propose cuts to eligibility and deeper cuts to benefits to close large gaps in fiscal year 2011 budgets. It is our understanding that Medicaid reductions have already been proposed for budgets in 30 states. Such actions would put the health and independence of millions of older Americans at risk, undermine our nation’s health care safety net and create a further drag on the economy just as the economy begins to show signs of recovery.

We urge you to act expeditiously to enact a six month extension of the Recovery Act Medicaid provisions, and we look forward to continuing our work with you to ensure that seniors’ access to health care will not suffer as a result of the economic recession.
Sincerely,
